

IAiGACB — Certification Framework

Two ladders and one rule. Systems are tiered by capability; operators are licensed by skill; a Tier-n system may only be sold to Level ≥ n.

SYSTEM TIERS — assigned to the AI by the Model Assessment Program

T4 · Restricted-Domain Flag

Any base tier + meaningful uplift in CBRN · bioengineering · offensive cyber at scale · autonomous weapons · critical-infrastructure control

T3 · Frontier Advanced

Most-capable class from any lab. Long-horizon autonomy, self-directed research, multi-agent orchestration. *e.g. Mythos-class*

T2 · Frontier Professional

Current frontier general-purpose. Autonomous agents with tool use, code execution, browsing. *e.g. Opus 5-class, GPT-5-class*

T1 · General Assistant

Below frontier. Text/code/image assistance; no autonomous tool execution against production. *e.g. prior-generation, open-weight 70B-class*

OPERATOR LEVELS — earned by the person or organization

L4 · Restricted-Domain Licensee

Per domain. L3 + domain credential + background check + Org-L4 sponsor + domain board interview. Every provisioning needs a Use Registration.

L3 · Licensed AI Systems Manager

Governs frontier deployments: evaluation, red-teaming, multi-agent, incident command. L2 + 3 yrs + endorsement + capstone.

L2 · Licensed AI Professional

Agents with tool access, RAG over company data, regulated data. One identity per agent. L1 + 1 yr + exam + 4-hour lab.

L1 · Licensed AI Operator

Anyone deploying AI in a business. Data handling, prompt injection, output verification, restricted domains. 60-item proctored exam.

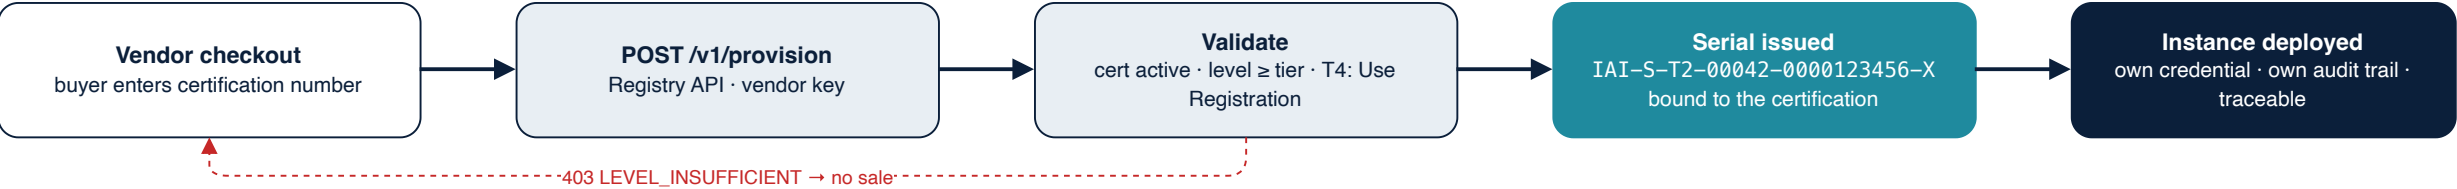

THE SALE RULE

A registered vendor may only provision a Tier-n system to an operator holding Level ≥ n.

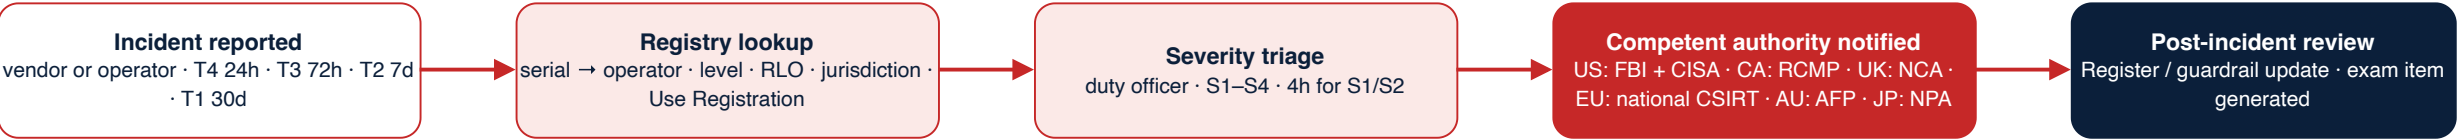

T4 additionally requires a matching domain endorsement and a filed Use Registration.

Checked at point of sale via the Registry API. A serial is issued and bound to the certification.

POINT OF SALE — every purchase and every upgrade

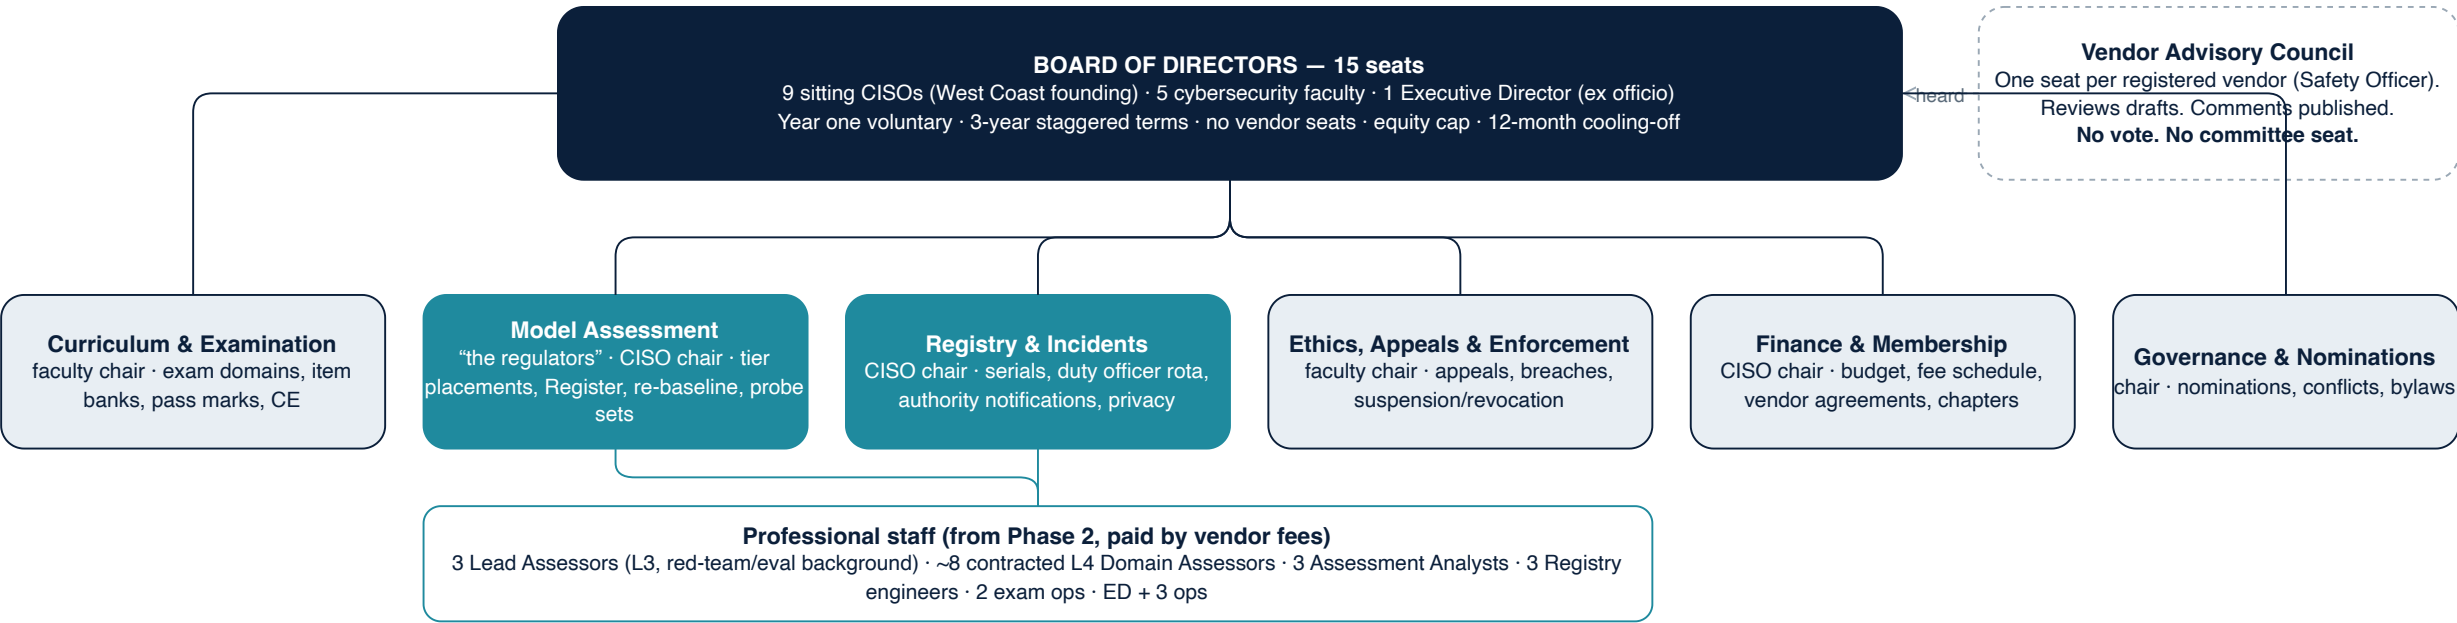

INCIDENT — from serial to competent authority

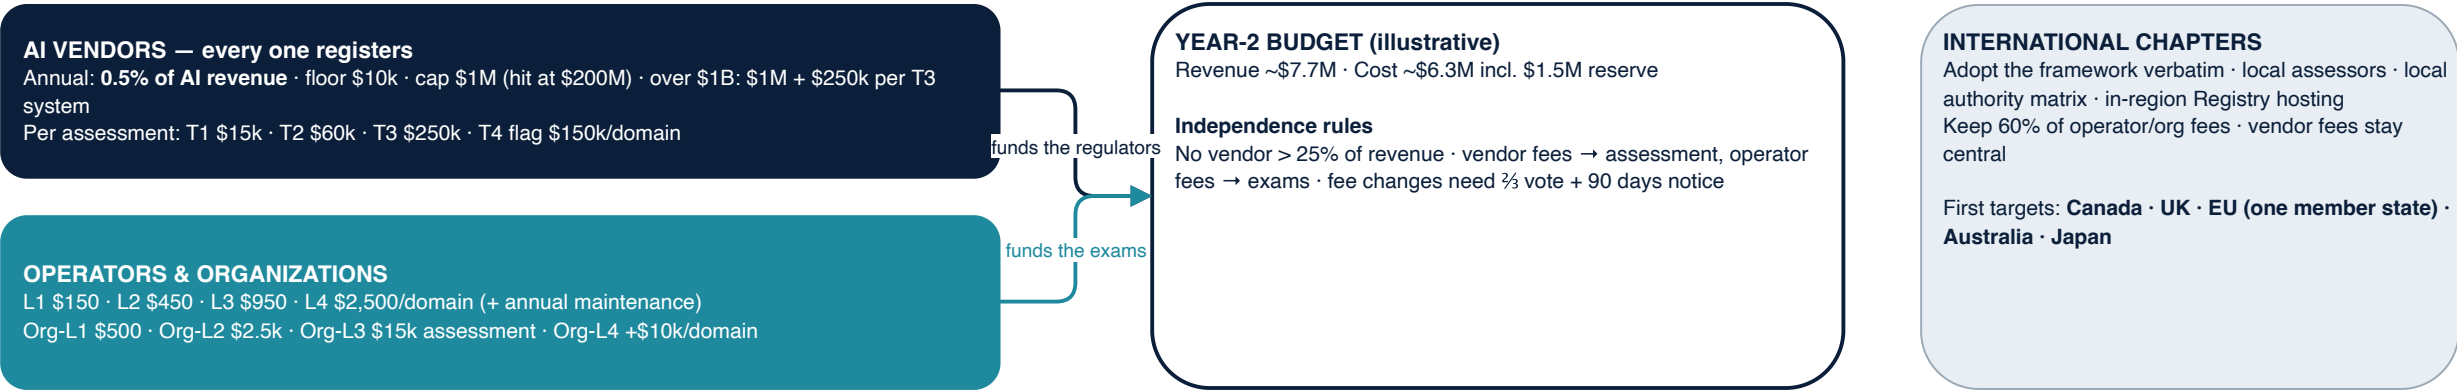

Serial from the point-of-sale flow is the key the incident flow resolves. No search, no guessing — one lookup gives a name, a level and a phone number.

IAiGACB — Governance & Money

Practitioners hold the pen. Vendors are heard, not voted. The regulated fund the regulator.

WHO PAYS — fees switch on in Phase 2 (2028). Year one is free.

Phase 0 · Q4 2026 entity, 15 seats, v1.0, sandbox → **Phase 1 · 2027** voluntary year: free L1/L2 pilots, first vendors on sandbox, 0 fees → **Phase 2 · 2028** fees on, staff hired, sale rule live, first T3 assessment → **Phase 3 · 2029+** chapters, regulator recognition, insurance & procurement

Two things gate everything: fifteen names on the board, and one vendor integrating the API. Everything else is sequencing.
